Additional uses council makes of household estimates**	**Does Authority undertake more detailed household analysis using the official data as baseline**	**If Yes, please say what additional detail is provided**	**Does Authority undertake it's own household est./project. using own methodology**	**Does Authority currently use household est./proj. prov. by ext. Agency (other than S.E)**	**If Yes, please indicate why you don't use official figs**
6	**Area**	**Areacode**						
7	Aberdeen City	100	Small area population estimates - see Q1	1	Small area population estimates - used with CHI data, electorate statistics, cencus data	1	0	
8	Aberdeenshire	110		0		1	0	Timing or sub-council area detail needed
9	Angus	120		1	But not with the official stats as a baseline. But official stats and the ones used by Council always comparible.	1	1	Based on Valuation Roll, annually (June), tenure, unit postcode
10	Argyll & Bute	130						
11	Clackmannanshire	150						
12	Dumfries & Galloway	170						
13	Dundee City	180						
14	East Ayrshire Council Housing Division of the Dept of Homes & Technical Services	190	Use Council Integrated Housing Management System to Respond to Enquiries, from Partners	1	SIP Statistics from the Local Housing Systems Analysis	1	0	In Addition to, not instead of.
15	East Ayrshire Council Planning and Building Control	190	Local Analyses, SIP Area Profiles	1	Market Surveys of Household Requirements	0	0	
16	East Dunbartonshire	200		0		0	0	
17	East Lothian	210		0		1	0	No sub local authority geographies provided, often need more up to date figures than those provided.
18	East Renfrewshire	220						
19	City of Edinburgh	230						
20	Falkirk	240	Base for drawing samples for surveys, general information requests.	1	Small area estimates for a variety of geographies.	1	0	Need for small area geography and sometimes more current figures than official estimates which are often 2 years out of date.
21	Fife	250	Housing Needs Surveys, Service Planning, Performance Indicators	0		0	0	
22	Glasgow & The Clyde Valley Structure Plan	260		0		1	1	Data from the voluntary population survey was used to provide a split by household type
23	Glasgow City	260		1	The Council prepares estimates of households by ward, postcode sector, SIP area and other areas, as required based on the results of the annual Voluntary Population Survey.	1	0	(1) Other data sources provide a more accurate assessment of housing stock and vacancies. (2) The time delay in the availability of household estimates currently we have MYE 2000 population estimates and 1999 household estimates.
24	Highland	270	Any needs assessment/planning re housing or community care, will be used for Supporting People needs analysis.	1	Calculate estimates for Council Areas (former Districts), Local Plan areas, key settlements and housing market areas.	1	0	Geography, base date.
25	Inverclyde	280	Household composition from VPS is used in a range of Service Planning activities by Social Work Service. Particular interest in lone parents, large families, elderly households. Education also use VPS for service planning because it gives the level of detail required for their purposes.	1	Social Work carry out service planning as detailed above.	0	1	Use Glasgow & Clyde Valley Structure Plan household estimates for Structure and Local Plan purposes. The official figures are used as a control. Also use VPS data for smaller area analysis.
26	Midlothian	290		0		1	0	Reasons of timing and geography. Prefer to use Census data updated with house completions figures.
27	Moray	300						
28	North Ayrshire	310	RESEARCH IN SUPPORT OF SPECIALIST NEEDS E.G. ELDERLY & LONE PARENT HOUSEHOLDS	1	HOUSEHOLD ESTIMATES ARE DISAGERATED TO COMMUNITY PLANNING AREA (FORMER LOCAL PLANNING AREAS) USING HOUSEHOLD COMPOSITION DATA FROM LOCAL VOLUNTARY POPULATION SURVEY.	1	0	USE V.P.S. TO PRODUCE HOUSEHOLD ESTIMATES FOR SPECIFIC TYPES OF HOUSEHOLD. HOWEVER, THESE ARE CONTROLLED TO 'OFFICIAL' ESTIMATES WHERE POSSIBLE.
29	North Lanarkshire	320	Use as denominators for calculationg rates for other data e.g. benefits information, crime statistics, health statistics; Weighting of local surveys.	0		1	0	Not available for small area geography or for household types. N.B. or own estimates are from the Voluntary Population Survey and are, strictly speaking, not 'household' estimates, but relate to 'residences' (i.e. groups ofpeople living at the same address). In North Lanarkshire, however, they do provide a good proxy for households due to the low level of op sharing.
30	Orkney Islands	330						
31	Perth & Kinross	340						
32	Renfrewshire	350						
33	Scottish Borders	355						
34	Shetland	360						
35	South Ayrshire Joint Structure Plan Team	370	Used in support of strategic planning work in Ayrshire e.g. housing demand, retail analysis etc	0	Generally no, however NAC does prepare sub council estimates which we consider in our own work. We would use sub council estimates if available. (resources and expertise does not make this possible elsewhere in Ayrshire)	0	0	
36	South Lanarkshire	380		0		0	0	
37	Stirling	390		0		0	0	
38	West Dunbartonshire (Social Work and Housing Services)	395	Household estimates are used in a number of Statutory Performance Indicators and Key Performance Indicators to determine ratios of service provisio per (for example) 10,000 households. Many aspects of Social Work Services require detailed analyses of households by age groups, gender,etc., to ensure that recommended levels of service provision are being met or to identify shortfalls in provision. Housing needs and demand can also be gauged from trends in household formation over time and the growth of, for example, single person households of younger and of older people.	1	Information is available down to Council Ward level and by post code sector/sub-sector for use in analysis of, for example, household characteristics in Social Inclusin Partnership (SIP_ areas, individual Wards, or by settlement area.	0	0	Not applicable.
39	West Dunbartonshire (Economic, Planning and Environmental Services)	395		1	Additional detail from Voluntary Population Survey. Structure Plan household estimate are tenured.	1	0	Yes from VPS based on any geography - data provided on full post code which can be aggregated up. Tenure required for projected demand.
40	West Lothian	400						
41	Western Isles	410

1	**HOUSEHOLD ESTIMATES:**							
2	**USER CONSULTATION**							
3	**QUESTIONNAIRE (LA)**							
4			**5. Priorities for Development of Household Estimates**					
5–6	**Area**	**Areacode**	**How Useful breakdown by household type: (0-3)**	**How Useful breakdown by tenure: (0-3)**	**How Useful breakdown by area within council: (0-3)**	**If useful or very useful:detail which would be useful & sorts of uses which would be made of the figs:**	**Apart from those listed, are there any further sub-divs your authority would find useful?**	**If Yes, what are they and what would they be used for?**
7	Aberdeen City	100	3	2	3	Useful in producing area profiles/neighbourhood statistics and, ultimately, helping the council to allocate its resources.	0	
8	Aberdeenshire	110	1	1	1		0	
9	Angus	120	3	3	3	Not sure how official stats could be provided at this level and detail perhaps one agency producing for all Councils could be a possibility.	1	Vacancy. Second homes.
10	Argyll & Bute	130						
11	Clackmannanshire	150						
12	Dumfries & Galloway	170						
13	Dundee City	180						
14	East Ayrshire Council Housing Division of the Dept of Homes & Technical Services	190	3	3	3	5.3 1. By postcode to provide more detail, as 'Area' definition is subjective. 2. Rural v's urban differences. 5.1/5.2 Balance stock availability with household size requirements, service planning, statutory plans. Identify Hotspots for Local Authority. SIP Statistics.	1	By postcode and by age as noted above.
15	East Ayrshire Council Planning and Building Control	190	-	-	2	The Household Growth characteristics of the former Kilmarnock and Loundon DC and the former Cumnock and Doon Valley DC which now comprise East Ayrshire Council are so markedly different that it would be useful for this distinction to be recorded.	1	
16	East Dunbartonshire	200	2	2	2	More use could potentially be made of the dataif it were broken down, for example, by settlement in the development of plans.	0	
17	East Lothian	210	1	1	2		0	
18	East Renfrewshire	220						
19	City of Edinburgh	230						
20	Falkirk	240	3	3	2	Household types especially single person households, pensioner households with children. Tenure - local authority, owner occupied, private rented housing association, Scottish Homes. Geographic breakdown needs to be very flexible so probably better to do own estimates.	1	We have used classifications such as ACORN and are asked for housing stock by age & type (eg detached) although these last two are housing rather than household variables.
21	Fife	250	1	3	3		0	
22	Glasgow & The Clyde Valley Structure Plan	260	3	3	2	Household type and data on tenure would enable useful comparisons with other sources to be made to voluntary population survey	-	
23	Glasgow City	260	3	3	2	(1) Household estimates by household type could be used to calibrate the household projections by household type. (2) Household estimates by tenure would be extremely useful for Structure Plan housing demand assesments. (3) Household estimates by area within council, would be useful, as housing market areas quite often contain parts of council areas.	0	
24	Highland	270	3	3	3	(1) Household type - single person, single parent, elderly, adult only, adult with children (consistent with data available from the Census and Scottis Household Survey). (2) Tenure - owner occupation, public rented, private rented, temporary (consistent with Census and Scottish Household Survey). (3) Geography - former Districts, housing market areas, settlement zones - generally as small as possible to enable build up to other areas. (4) Would be used for all planning purposes with detail necessary to make sense of local picture and to enable a fuller understanding of issues.	1	
25	Inverclyde	280	3	3	3	Information on household type and tenure would be useful as an idication of change which currently is only available for census years. At present it i impossible to get any information on private rented housing other than the cencus. If you have such detailed information and could make it available it would be very useful as a check especially if it was broken down to ward, post code or settlement levels. Household type information on lone parents, elderly over 75, households with children would be useful if geographic distribution could be analysed for service provision.	0	
26	Midlothian	290	2	2	3	Household type - useful for looking at household markets. Prob would be happy with flats and "family housing" (detached/semis etc.) Tenure private/rented from LA/HA would be adequate (to tie in with housing audits and current Structure Plan) Area within council - settlements prob best, although I suppose wards would do as well.	0	
27	Moray	300						
28	North Ayrshire	310	3	3	2	5.1 AGE OF HOUSEHOLD REFERENCE PERSON AND BASIC COMPOSITION E.G. SINGLE ADULT, LONE PARENT, TWO+ ADULTS, TWO+ ADULTS/ONE+ CHILDREN. - BASIS FOR ASSESSING SPECIFIC HOUSING/SERVICE(S) REQUIREMENTS. 5.2 BROAD SPLIT BETWEEN PRIVATE SECTOR, LA RENTED, HA RENTED AND OTHER. - HOUSING PLANS /LOCAL PLANS AND VARIOUS MONITORING EXERCISES. 5.3 SPLIT BY POSTCODE SECTOR AREAS. - AS ABOVE 5.1 & 5.2.	0	
29	North Lanarkshire	320	3	2	3	**Household type:** single person, lone parent,pensioner, family households etc. (similar to household projections) - uses: local housing need/demanc estimating need for care services; demand for childcare; demand for leisure and cultural facilities; regeneration/SIP monitoring etc.etc **Tenure:** owner occupied, council, housing association, private rented - uses: estimating local housing requirements; regeneration/SIP monitoring **Area:** as small as posssible e.g. unit postcode for use as building blocks; or, if not possible electoral wards (or geography being developed for neighbourhood statistics, if this meets our needs); settlements/communities - uses: as above.	1	If ward (or postcode based) estimates were not available, former districts are useful. Uses, as stated previously.
30	Orkney Islands	330						
31	Perth & Kinross	340						
32	Renfrewshire	350						
33	Scottish Borders	355						
34	Shetland	360						
35	South Ayrshire Joint Structure Plan Team	370	3	-	3	The sub area estimates would be useful. For example if it was possible to produce at a postcode sector level aggregations to sub housing market areas may be possible. This scale of dissagregation would require detailed knowledge of stock change etc. which might be difficult at a Scottish level.	0	
36	South Lanarkshire	380	2	3	2	To help with the stock assesment.	0	
37	Stirling	390	3	3	3		0	
38	West Dunbartonshire (Social Work and Housing Services)	395	3	3	3	Household type - very useful for gauging the need for particular sizes and types of housing, including special forms of housing such as sheltered/ver sheltered and housing for the elderly/disabled, also smaller houses for new single person households (all age groups). Tenure - very useful when linke to geographical distribution to determine over- and under-provision of houses, for example, for 'starter homes' in the private market, larger family size homes in all sectors, etc. Area within council - please refer to 3 and 4.1 above.	0	
39	West Dunbartonshire (Economic, Planning and Environmental Services)	395	3	3	3	Household types for estimates of large households, single person, elderly etc. Tenure obviously useful - especially for structure plan purposes. By ward would aid as a check to VPS.	0

14	East Ayrshire Council Housing Division of the Dept of Homes & Technical Services	190	No	-		1	0	0	0		0	
15	East Ayrshire Council Planning and Building Control	190		2	The latest estimates should be accompanied by the methodology upon which they are based.	1	0	0	0		0	
16	East Dunbartonshire	200		1		1	0	0	0		0	
17	East Lothian	210		2		1	0	0	0		0	By mail
18	East Renfrewshire	220										
19	City of Edinburgh	230										
20	Falkirk	240	Use of Council Tax register for housing stock. Investigate CHI for household types	3	Slightly larger period for consultation. Some explanation of changes made after consultation. Consultation much earlier - data is well out of date compared with mid year estimates of population.	1	0	1	0		0	Direct e-mail
21	Fife	250		3		1	0	0	0		0	
22	Glasgow & The Clyde Valley Structure Plan	260		3		1	1	0	0		0	
23	Glasgow City	260	Use of the Council Tax register as a basis for housing stock estimates should be considered. The feasibility of using Council Tax register data to estimate vacancy rates should be investigated.	3	Consultation is useful, because it improves consistency between "office estimates" and the council's own estimate.	1	0	1	0		0	
24	Highland	270	Interested in relationship between actual and potential households to give some kind of indicatio of hidden households.	3		1	1	0	1	Internally Published documents	0	Emailed directly.
25	Inverclyde	280		3		1	1	1	0		0	
26	Midlothian	290		3	I notice when we are asked to check the figures they rarely tie in with the Building Control data which we use and which the SE use to derive the figures - I am mystified as to how these discrepancies occur!	0	0	1	0		0	No.
27	Moray	300										
28	North Ayrshire	310	ALT. - COUNCIL TAX REGISTER SUBJECT TO RELIABILITY OF DATA AND COMPREHENSIVENESS OF COVERAGE.	2	IMPROVEMENT IN DATA ACCUARCY WOULD PROBABLY BE ACHIEVED IF LOCAL AUTHORITIES KEPT UP TO DATE WITH RETURNS ON HOUSE COMPLETIONS, CONVERSIONS ETC. 2001 CENSUS RESULTS WILL BETTER REFLECT THE RELATIONSHIP OF HOUSEHOLD NUMBERS TO EFFECTIVE STOCK.	1	1	0	0		0	
29	North Lanarkshire	320	Use of Council Tax Register for total housing stock (and possibly tenure,vacancies etc.) if the data is available for all areas and is robust. Need to ensure household estimates are consistent with GRO mid-year population estimates. Possible use of results from the Scottish Household Survey - to inform breakdowns by type etc.	2		1	1	1	0		0	Useful to be alerted by e-mail that the estimates are available, with a link to the document or to be provided with the full details of the estimates by e-mail.

33	Scottish Borders	355										
34	Shetland	360										
35	South Ayrshire Joint Structure Plan Team	370	The 2001 Census will obviously give a new baseline. Stock completions and demolitions are generally well documented at an authority level. Can the Scottish Household Survey assist either in data provisionor in cross checking of output? To what extent is information collected by the Regional Assessors imputed into the derivation of the estimates.	-	The Stucture Plan Team has not in the past been involved in this consultation.	1	0	0	0		0	Email - Or awareness of a Website where data can be downloaded.
36	South Lanarkshire	380		2		1	0	0	0		0	
37	Stirling	390		-	More time	1	1	0	0		0	
38	West Dunbartonshire (Social Work and Housing Services)	395	No suggestions.	3	No suggestions.	1	1	0	1	estimates and Voluntary Population Surveys.	0	No suggestions.
39	West Dunbartonshire (Economic, Planning and Environmental Services)	395	I think that the figures for closures and demolitions should be split since 'closed' or 'non effective' stock can be brought back into use through rehabilitation. Information on completions, demolitions etc can often be provided more accurately than the formal SE returns.	3	Longer deadline, giving a better chance to discuss any changes.	0	0	1	0		0

6	**Area**	**Areacode**		**Name of Sender**	**Job Title / Dept**
7	Aberdeen City	100	* Slight problem getting hold of unpublised household estimates produced using "old" methodology.	Tom Snowling	
8	Aberdeenshire	110		Richard Belding	
9	Angus	120		Tom McCann	
10	Argyll & Bute	130			
11	Clackmannanshire	150			
12	Dumfries & Galloway	170			
13	Dundee City	180			
14	East Ayrshire Council Housing Division of the Dept of Homes & Technical Services	190	Not seen household estimates format on the internet. Where details can be provided on an excel spreadsheet, data could be manipulated at a local authority level.	Joseph Cassidy	* Housing Division
15	East Ayrshire Council Planning and Building Control	190		Chris Trevor	* Planning and Building Control Division
16	East Dunbartonshire	200		Katrina McWilliam	
17	East Lothian	210		Mike Wynne	
18	East Renfrewshire	220			
19	City of Edinburgh	230			
20	Falkirk	240	I welcome this attempt to improve the household estimates. More consideration might be given to housing stock estimates. Please continue to consult users.	Jennifer Boag	
21	Fife	250		Alex Dalrymple	
22	Glasgow & The Clyde Valley Structure Plan	260		David McAllister	
23	Glasgow City	260	It is important that population and household estimates are consistent. It would be useful if the population estimates could be broken down by: in households and in institutions. Trends in the average household size should be monitored and should be related to changes in the distibution of households by household type.	Jan Freeke	
24	Highland	270	It would be desirable to get the household estimates more quickly after the production of the population estimates.	Margaret Bochel	
25	Inverclyde	280		Fergus Macleod	
26	Midlothian	290		Stephen Benge	
27	Moray	300			
28	North Ayrshire	310	FEASIBILITY OF USING THE COUNCIL TAX REGISTER AS A BASIS FOR DERIVING ESTIMATES ACROSS SCOTLAND SHOULD BE A PRIORITY CONSIDERATION.	Stephen Fraser	
29	North Lanarkshire	320	There is a need to provide the estimates sooner, say shortly after the mid-year population estimaes are published (although I am aware that the 'hold up' is often the late return of local authority housin returns).	Derek Neill	
30	Orkney Islands	330			
31	Perth & Kinross	340			
32	Renfrewshire	350			
33	Scottish Borders	355			
34	Shetland	360			
35	South Ayrshire Joint Structure Plan Team	370	The two-year cycle should be maintained. Stability in the process is important. Changes ir methodology should only be introduced gradually. To avoid wide variations in the forecasts. The presentation of scenarios could be considered. The current forecasts/estimates are vital to our work, understood and viewed as being consistent across Scotland.	John W. Esslemont	
36	South Lanarkshire	380		Laura M. Gaddis	
37	Stirling	390		Caroline Moore	
38	West Dunbartonshire (Social Work and Housing Services)	395	Information broken down in to sub-divisions indicated in 4.1 and 5.1-5.3 above would be very usefu as individual departments and Elected Members are frequently looking for area specific information rather than the council-wide picture. WDC produces a Social and Economic Profile and this type of breakdown would be very useful in collating a publication of this type.	Ronnie Lee	* Social Work and Housing Services
39	West Dunbartonshire (Economic, Planning and Environmental Services)	395		Rhona Hayton	* Economic, Planning and Housing Services
